

SOLUTIONS

Benchmark Series™ 7

Teller cash dispenser

“We found that the use of cash dispensers has been very effective in enabling staff to concentrate on their primary activity of assisting customers.”

Financial Institution President and CEO

faster transactions

Benchmark Series 7 quickly and accurately dispenses currency, which improves branch productivity and enhances client service while decreasing costs.

Protect your cash, staff and customers

The vault-level steel safe reduces cash exposure, while protecting your staff and your customers. The frontline is more secure and an open branch banking or an open retail floor plan is possible with cash exposure nearly eliminated.

Improve transaction efficiency and enhance your staff and customer experience

Accuracy and speed are two components that create transactional credibility with customers. With a dispensing mechanism built for high volume, both in note mix and transactions, Benchmark provides this credibility. With three configurations, the 730, 750 and 750 Client Dispense, Benchmark Series 7 allows for multiple uses within the branch or store. Designed for low, medium and high volume applications, Benchmark enables an effortless transaction; allowing a more consultative conversation, while creating a better staff and customer experience.

Lower total cost of ownership

Benchmark Series 7 employs a dispensing mechanism built for high volume transactions. This results in greater equipment up-time, less service calls and a better staff experience, as they continue assisting customers. Because Benchmark is purpose-built, it is one of the most reliable dispensers on the market. Coupled with Talaris' top rated service, it is the risk-free choice.

Increase frontline employee productivity

Processing and balancing time will improve between 30-50% by eliminating manual cash handling processes. This returned time can be used by frontline staff to focus their attention on customer service and revenue generating products. Vault-buys can be done easily and effortlessly as the dispenser allows for third terminal vault-buys and eliminates the need for dual control; freeing up staff to continue assisting customers.

OPTIONS

Deposit drop boxes

Checks and other securities can be placed immediately upon receipt in secured lock boxes. Two day-safe deposit drop boxes are available, increasing security and opening up space by eliminating the need for a cash drawer.

InstaChange™ coin dispenser

InstaChange conveniently fits on most counters and can be shared by staff members. The easy to use, top-loading design holds \$150 of mixed coin; more than any other coin dispenser in the industry. The coin dispenser features audible and visual low coin level indicators and is aesthetically designed to compliment any business environment.

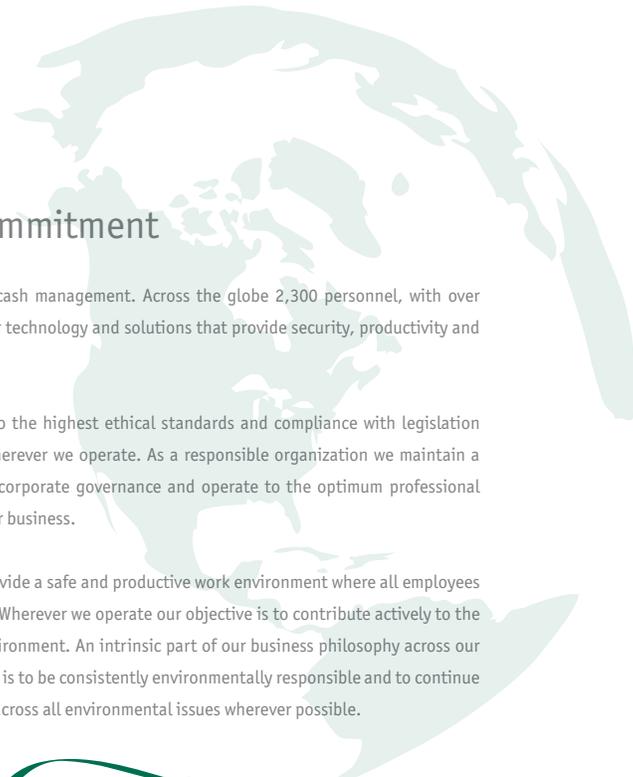

Client dispense

This configuration orients Benchmark Series 7 to dispense currency directly to your clients giving staff more time to focus on better serving the customer. Security is conveniently maintained as service accessibility can be achieved through the rear door, located behind the counter.

Benchmark allows your lines to move faster, while freeing your staff to provide more personable service.

The Talaris Commitment

Talaris is a World Expert in cash management. Across the globe 2,300 personnel, with over 130 business partners deliver technology and solutions that provide security, productivity and innovation to our customers.

The company is committed to the highest ethical standards and compliance with legislation and to be a fair employer wherever we operate.
