

The best-in-class assisted self-service banking solution

The 8LR is a multifunctional, cash recycling, on demand tablet/video branch solution. The 8LR gives your consumers a choice on how to interact: self-service or with the help of on demand tablet/video assistance. When deployed with our integrated software approach and video assistance support, the 8LR supports a wide range of transactions, not just ATM transactions.

Features

Innovative Technology

Full function deposit capability, ability to deliver transactions through self-service or with the support of on demand tablets/video agents, and recycling, the 8LR has helped make Hyosung the fastest growing ATM company in the global market. High capacity recycling enables financial institutions to not only deliver convenience to consumers, but creates efficiencies within the cash cycle.

Enhanced Usability

A user interface specifically adapted to accommodate the full range of branch banking needs. A dual screen interface that enhances security and provides unparalleled video teller assistance. Multiple customer authentication options including contactless and biometrics.

Highest Availability

Innovative modular design and high capacity allow for industry leading availability and serviceability. Fast, easy replenishment and reduced downtime. The 8LR is designed to provide reliability that is unequaled in the market, with minimum maintenance and maximum uptime.

Superior Capacity

High capacity, cash recycler capability and the ability to support multi-check function.
